Dear Caroline.

I received your letter nudging me to respond to your petition of 22 Feb 89.

I approved your petition on the portion dealing with the legal aspects of your petition when I first received it. However, I could not approve it in total as I am not a finance authority.

I did research out thoroughly the LRH references on the payment of staff medical bills, and I attached the issues I found to my recommendation to the FBO FSO that your petition be fully approved and implemented. LRH does state in no uncertain terms that a staff members medical bills are covered under his staff agreement and there is no question in my mind that these bills should be paid by the FSO. In a court of law, the FSO will be held fully responsible for your bills as it is part of your legally binding staff agreement.

Since that time, there has been non-compliance on getting your bills on the FSO bills summary and this is being handled. I would like you to write a full KR on this whole sit in PT, as the Purser is right now getting a comm ev and she is the party responsible for your bills being taken off the bills summary. Please get this to me in the next 48 hours and I will see it gets to her comm ev secretary.

While this is getting sorted out, continue to maintain a low profile. I want to get all your bills on the bills summary this week. From that point on, legal will have the authority to say it is an org bill and get in comm with the attorneys/collection agencies and prevent these from becoming lawsuits. Another 4 or 5 of your medical bills have been sent to collection agencies, as

-2-

they have come to me through the legal mail line. These are all addressed to FSO Corp and not yourself.

What I would like to see, which you have not addressed in your petition, is do you have any reentry program to the Sea Org? Once this medical sit is fully handled, are you then able to return to active duty? Since you are a Class 9 auditor, you are a valuable resource and I want to find out about your status. Please let me know on this as the ideal scene, based on what I know of your sit, is to get you fully

recovered and back on staff in the FSO.

I look forward to getting your reply to the above. Please give me your phone number so we can keep in comm.

Sincerely,

Judy Johnson
