

HCOB: False Purpose Rundown

Hubbard introduces the False Purpose Rundown, a brainwashing technique designed to eradicate unacceptable intentions and remove restraints from actions. He claims that the FPRD solves the damage that psychiatrists have been inflicting on the human race for a near eternity. Hubbard claims that the FPRD removes backoff that was falsely imposed by psychiatrists. The FPRD elicits confessions to specific types of crimes using the E-Meter, in the same manner as their normal interrogation technique, called security checking.

The FPRD adds a step to the security check procedure. After confessing to a chain of similar crimes, the FPRD auditor gets the interrogee to articulate the evil intention or false purpose that led him to commit those crimes. The interrogee is interrogated to identify the external source for the crimes. FPRD Indoctrination says the ultimate source are psychiatrists, who have existed as implanters since time immemorial.

Hubbard promotes the removal of self-restraint.
RESEARCH

The tech research done was quite extensive and involves several major discoveries. But I'll let you in on one thing: There were psychiatrists who existed way, way back on the track¹.

It was the aim of these psychs back on the whole track to very carefully push in people's anchor points² to prevent them from reaching. The psychs were, themselves, a bunch of terrified cowards, and the prevention of reaching was one facet of their operation. Handling overts, withholds and nonsurvival purposes³ with the False Purpose Rundown has proven highly effective in undoing the effects of the "work" of psychs on the whole track, and restoring the thetan's willingness and ability to reach.

[...]
RESULTS

Pcs and pre-OTs report—and folder studies confirm—a very high rate of case gain per hour of auditing on this rundown, with unwanted fixed conditions and considerations dropping away left and right.

Barriers to enjoyment of life and attainment of goals that before seemed solid and formidable can be whisked away like a puff of smoke before a fresh gust of wind.

What would be left if such barriers were gone? Certainty of self and one's basic purposes and intentions—and a revitalized reach, drive and confidence in one's ability to achieve them, free from self-restraint.

And that spells a better game!

—L. Ron Hubbard

HCOB False Purpose Rundown pdf 1 track or whole track: refers to a record of past lives extending back along a time track of trillions of years. Hubbard made many claims about his discovery of this supposed track, and about his proprietary mental technology that deletes its disastrous effects. In the current context, Hubbard claims to have discovered the common villain for mankind's entire existence is "the psych." Scientology claims that psychiatrists are the root cause for every bad condition in the universe. 2 push in anchor points: loosely translated, this means to actively put someone in a psychologically introverted state. 3 overts, withholds and nonsurvival purposes: refers to crimes and discreditable psychological factors extracted by Scientology's interrogation specialists, called security checkers and False Purpose Rundown (FPRD) auditors.
